# Covid-19 Data

Tags: Django, Consuming APIs

Objectives

Get the latest figure (accumulative till now) of Covid-19-caused deaths for these countries: US, UK, Italy, India, Pakistan.

Show the data in a Pie Chart like the above using Google Charts.

Instructions

- The limit for free API requests is 50,000. Don't even go near that. Save the response once and work with that.
- Use Django as the backend. Just one URL will be fine.
- Use Django template language for the frontend.
